

our passion  our patients

My passion...

“The only motivation that we ever had, and still hold to, is service to our community. This work that we get to do every day is the greatest privilege I have ever been afforded and it’s something my crew and I never take for granted. Our clinic houses the energy of every provider, nurse, trainee or staff member who ever walked through its doors, and as a result, it is the single best clinic in which I have ever worked. It’s an incredibly special place.”

Anthony Martinez, MD, AAHIVS
Medical Director, Hepatology and Immunodeficiency Services, ECMC
Associate Professor of Medicine
Division of Gastroenterology, Hepatology and Nutrition,
University at Buffalo

Letters from our Patients

Each and every employee my family, friends and I encountered including Rehab Staff, Housekeeping Staff, Dietary Staff, etc., were all compassionate and very respectful. Your nurses are a credit to the health care profession, and we, in the Western New York community, are indeed fortunate to have such a remarkable hospital organization in our area.
