

our passion  our patients

## My passion...

*"I'm passionate about caring for our patients and advocating for their best clinical outcome. I want to ensure each patient receives quality care when they step through our doors. Treating each patient with respect, dignity, and compassion are my priorities. Ensuring that each patient is treated as if they were one of my family members is most important to me."*

**Santosha Gompah, RN BS**

## Letters from our Patients

First, I would like to clearly state that I am not one to put pen to paper...In this instance I feel it necessary to do so, for I want to praise the fabulous staff you have at ECMC. It is more than a building filled with a talented medical staff. Everyone comes across as a truly caring 'family'. The hospital was immaculate... the staff was always happy and accommodating. Everyone spoke about how they truly liked working at ECMC. They were always kind and respectful. I cannot thank everyone enough for the care my husband was given. Please continue to do what you are doing. They are an amazing group of talented people. You are all very lucky to have each other.

*Judi, wife of ECMC patient*
