

our passion  our patients

## My passion...

*“Working in the dental field within Oral Oncology & Maxillofacial Prosthetics, we realize that some patients may be uncomfortable about going to the dentist. To address the concerns of our patients, my goals are to treat each patient with dignity, respect, kindness, and empathy, and to bring a smile to the face of each patient who walks into our clinic.”*

**Jill Vicaretti**  
**Dental Assistant, Dental Oncology**

## Letters from our Patients

Dear Nurses of the Burn Unit:

Thank you so much for taking such good care of me while I was admitted to the unit. It was a really scary and traumatic time for me, but you got me through it – the infection, the wound care, the skin grafts, the bed rest, the shock of it all, the pain, walking again after the accident, etc.

You kept me as comfortable and calm as possible. I really appreciated all the supportive and empathetic conversations, the hair washes and the snacks. I was beyond impressed by the quality of care I received from you guys, and I really don't think I would have been able to get through it all without you. I'll never forget what you did for me.

Love,

*Diana, Former Patient*
