WHEREAS, despite the isolated nature of these results, while its construction manager obtains formal bids for asbestos abatement work, the Corporation has determined it has an immediate need to have such work performed on an emergent basis to remediate any rooms in which it has determined there is potential for asbestos danger, in order to ensure the safety of its staff, contractors, and patients; and

EMERGENCY PROCUREMENT
JUSTIFICATION

In the case of a public emergency arising out of an accident or other unforeseen occurrence or condition whereby circumstances affecting public buildings, public property or the life, health, safety or property of ECMCC’s patients or staff, require immediate action which cannot await competitive bidding or competitive offering, contracts for public work or the purchase of supplies, material or equipment may be let by the appropriate officer, board or agency of a political subdivision or district therein. See NY General Municipal Law § 102(4).

ECMCC’s procurement guidelines require the following:
1. The emergency Procurement shall be limited to those supplies, services or construction items necessary to meet the immediate emergency.
2. Whenever practicable, approval of the CEO shall be obtained prior to the Procurement.
3. Emergency Procurements shall be made with such competition as is practicable under the circumstances;
4. The official responsible for the Procurement shall submit to the Board of Directors a written determination of the basis for the emergency and for the selection of the particular Contractor prior to the next meeting of the Board and the Board shall ratify the Emergency Procurement at such Board meeting.

Attach dated quote and any other relevant documentation regarding the procurement.

1. Name of product and manufacturer or supplier:
   Metro Environmental.

2. Fully describe the circumstances leading to the immediate need for this emergency procurement.
   As part of its building envelope project, during the removal and replacement of certain exterior windows, unforeseen asbestos-containing joint compound was encountered along the interior perimeter of the window openings. This condition was identified at various locations in the Lab building, with potential for findings in other future work locations, requiring the evacuation of potentially-affected areas pending testing and ultimate abatement work. An emergency clean-up variance was solicited and approved by the NYS Department of Labor on 11/12/19 to clean the known impacted work areas.

3. Describe how this vendor can meet ECMCC’s immediate needs.
   The construction manager on this project, Gilbane Building Company, has solicited three proposals for the cleanup scope of work. The lowest proposal was submitted by Metro Environmental at approximately half the cost of the next lowest proposal. Additionally, Metro Environmental is already performing asbestos abatement work in the stair towers of the main building for other portions of the building envelope project. They are ready to mobilize and start the work this week. In the meantime, Gilbane will seek to engage a long-term asbestos abatement contractor via traditional procurement methods to address any future issues that may arise. The scope of this emergency request is therefore only to the extent required to perform work in the interim.

4. Describe any efforts used to determine that this vendor is the best opportunity available to ECMCC under the circumstances.
   Multiple quotes were obtained by the construction manager (see comments above).
